

The equipment must be checked for correct operation and safety, especially the points listed below:

Proof of maintenance

Wooden parts

1. Check for rot and, if necessary, smooth out splinters and round off sharp edges of cracks.

2. Check that all bolts and screws as well as all wood joints are tight, retighten if necessary.

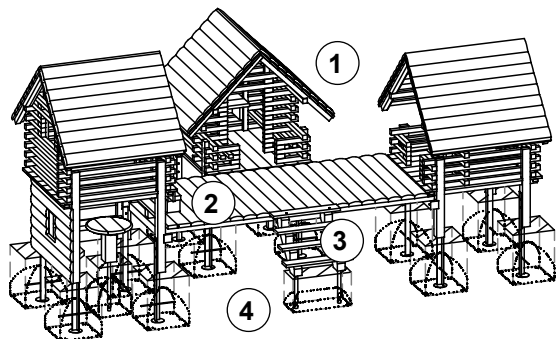

3. Check steps for wear and tear: at least 2/3 of the material should be left, replace if necessary.

- ## Structural stability

4. Uncover the foundations once a year in order to check the structural stability as follows:

- wood for rot
- steel for corrosion
- anchoring to the ground for stability
- condition of concrete foundations

Special notes, e.g. for repairs

**Repair not carried out,
equipment is taken out of action**

**All work carried out,
everything is in order**

Maintenance carried out by:

..... **Date**

For spare parts refer to back of page.
