

Instructions for wear checks of play equipment

The equipment must be checked for correct operation and safety, especially the points listed below:

Proof of maintenance

Playground

Date of installation

Checks depend on the type of equipment. Any equipment with moving parts must be checked at least twice a year, static equipment at least once a year.

Intervals for maintenance work and checks generally depend on

- location
- kind of use
- frequency of use
- possible vandalism

For more details see also "General instructions for maintenance of playgrounds".

Small Bucket Wheel
Order No. 5.15910/5.15915
 for in-situ concrete foundations

Bucket wheel

1. Check that the axle is stable; if necessary tighten locking screws with a 13 mm spanner.

Axle

2. Check that the axle moves freely in the bearing blocks (4 maintenance-free bearings).

Suspension

3. Check that the suspension rod moves freely and without tension. Check that the cotter pins are present.

Structural stability

4. Check the structural stability of the supporting posts once a year (the foundation of the equipment is dependent on the local installation situation).

Special notes, e.g. for repairs

Repair not carried out, it is still possible to play on equipment

Repair not carried out, equipment is taken out of action

All work carried out, everything is in order

Maintenance carried out by:

..... Date
